 - Designed an agentic workflow to coordinate AI-driven website generation tasks.
 - Integrated Model Context Protocol (MCP) for structured interaction between AI agents and external tools.
 - Implemented browser-based code execution and live preview using WebContainers.
 - Integrated Docker and Apache Kafka for containerized and event-driven application workflows.

Bookstore API [🔗](#)

2026

- Node.js, Express.js, TypeScript, Prisma, SQLite, JWT
- Developed a RESTful API using Node.js, Express.js, TypeScript, Prisma, and SQLite for bookstore management.
 - Implemented JWT-based authentication, role-based access control (RBAC), CRUD operations, and protected API routes.
 - Applied layered architecture, request validation, centralized error handling, and ORM-based database access.

E-Commerce Database Management System [🔗](#)

2025

- MySQL 8.0, Stored Procedures, Triggers, Views, RBAC, Window Functions, Query Optimization
- Designed a 19-table BCNF e-commerce database for catalog, orders, inventory, payments, and coupons.
 - Implemented stored procedures and triggers for ACID-safe order, payment, and inventory workflows.
 - Built reporting views and analytical queries using CTEs and window functions for key business KPIs.
 - Improved performance with B-Tree/composite indexes, EXPLAIN tuning, and RBAC for 3 user roles.
