PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building end-to-end web applications using React.js, Node.js, Express.js, TypeScript, Python, SQL, and NoSQL databases. Strong foundation in Data Structures & Algorithms, OOP, DBMS, Operating Systems, and REST API development. Experienced in developing authenticated APIs, optimising SQL queries, and integrating LLM-powered and Agentic AI workflows.

TECHNICAL SKILLS

Languages Core Java, JavaScript (ES6+), TypeScript, Python, SQL	CS Fundamentals Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Backend Node.js, Express.js, REST APIs, JWT Authentication, Prisma, ORM, Zod	Frontend React.js, HTML5, CSS3, Bootstrap, Responsive Design
Databases MySQL, MongoDB, RDBMS, Query Optimization, ER Modeling	AI & Agentic AI Generative AI, LLMs, Agentic AI, AI Agents, Prompt Engineering, MCP
Tools Git, GitHub, VS Code, Postman, Bruno, Docker	

PROJECTS

AI Website Generator 🔗 React, Node.js, Python, LLMs, Agentic AI, MCP, Docker, Apache Kafka, ClickHouse, WebContainers - Built a full-stack AI platform that converts natural-language requirements into deployable websites. - Designed an agentic workflow to coordinate AI-driven website generation tasks. - Integrated Model Context Protocol (MCP) for structured interaction between AI agents and external tools. - Implemented browser-based code execution and live preview using WebContainers. - Integrated Docker and Apache Kafka for containerized and event-driven application workflows.	2026
Bookstore API 🔗 Node.js, Express.js, TypeScript, Prisma, SQLite, JWT - Developed a RESTful API using Node.js, Express.js, TypeScript, Prisma, and SQLite for bookstore management. - Implemented JWT-based authentication, role-based access control (RBAC), CRUD operations, and protected API routes. - Applied layered architecture, request validation, centralized error handling, and ORM-based database access.	2026
E-Commerce Database Management System 🔗 MySQL 8.0, Stored Procedures, Triggers, Views, RBAC, Window Functions, Query Optimization - Designed a 19-table BCNF e-commerce database for catalog, orders, inventory, payments, and coupons. - Implemented stored procedures and triggers for ACID-safe order, payment, and inventory workflows. - Built reporting views and analytical queries using CTEs and window functions for key business KPIs. - Improved performance with B-Tree/composite indexes, EXPLAIN tuning, and RBAC for 3 user roles.	2025

EDUCATION

B.E. Computer Engineering Vishwaniketan's IMEET, University of Mumbai Relevant: DSA, DBMS, Operating Systems, OOP, Full Stack Development	2022 – 2026 Mumbai, India
10th MSBSHSE Shreemant Shivajiraje English Medium School	2019 – 2020 Phaltan, India
12th MSBSHSE Mudhoji High School and Jr. College	2021 – 2022 Phaltan, India

CERTIFICATIONS & ACHIEVEMENTS

• Full Stack Generative & Agentic AI with Python 🔗	• IoT Monitoring & Optimization 🔗	• Java Programming – Beginner to Master 🔗
--	-----------------------------------	---
